PROFILE SUMMARY

Computer Science graduate with hands on experience building and shipping web applications using HTML, CSS and JavaScript. Built two projects: Business Co-pilot for inventory management and Traders Lab for trading journaling. Currently strengthening JavaScript and expanding into backend engineering with Node.js, Python and FastAPI through Outcome School. Seeking a software engineering internship to contribute to real projects and learn from experienced developers.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), HTML5, CSS3

Web Engineering: DOM Manipulation, Responsive Design, Browser Data Persistence (localStorage)

Developer Tools: Git, GitHub, Visual Studio Code

Currently Learning: Node.js, Python, FastAPI, REST API Developments

PROJECTS

Business Co-pilot | HTML, CSS, JavaScript, Local Storage

- Designed and built a business and inventory management application that helps small businesses track product records through a single interface
- Implemented client side authentication, structured inventory workflows and browser based data persistence

Traders Lab V1 | HTML, CSS, JavaScript, Local Storage

- Developed and shipped a trading journal application that lets traders record, organize and review their trades
- Built dashboard components for performance analytics and trade statistics

EDUCATION AND CERTIFICATIONS

Introduction to Programming Certification | Outcome School

Certificate ID: OS-2026-00002 | Issued October 2026

- Covered core programming principles, DOM interaction and real world project builds

Higher National Diploma (HND) in Computer Science

Federal Polytechnic Offa, Kwara State, Nigeria | 2022 to 2024

Ordinary National Diploma (OND) in Computer Science

Lens Polytechnic Offa, Kwara State, Nigeria | 2015 to 2017
